ON-SITE WASTEWATER TREATMENT

- Contract Dewatering services to convert machining oils, coolants, and spent parts-wash into disposable solids and return clean water to your plant.

PROCESS APPLICATIONS AND SPECIALTY CHEMISTRY

- **Solid/Liquid Separation:**
Specially blended polymers for the flocculation and settling of waste water streams.
- **Sludge Conditioning:**
Speed water release and reduce sludge digestion/removal costs.
- **Filter Technologies:**
Crystal formation, pre-coating, release agents, metals or oil cleaner.
- **Foam Control:**
Injection point design guidance to deter or remove foam.
- **Biological Treatments:**
Bacteria for denitrification and BOD elimination.
- **Blended Acids/Caustics:**
Additives for safe handling and low fuming. Cleaners with flash rust inhibitors.
- **Waste Haul Off Alternatives:**
Custom waste treatment.

A

- Acetate, N Butyl
- Acetate, N Propyl
- Acetic Acid 28%, 56%
- Acetic Acid Glacial 99.5%
